For Admin, have access to whole student information and examination information as well. Both on-going and participated examination details are open for admin. Choose subject in top navigation bar to view information. Admin can register a new student as well. Also, admin can view student full information from the admin portal and have ability to remove as well. (Profile button to view). Finally, search functions are also work in table pages.

For Teachers, only have access to view student name, index number and marks for each subject. Choose subject from top navigation bar to view these details. Specially in here, only participated examination results are visible to teacher. On-Going examination details and student bio data are hide and that information are not visible to teacher (Only visible for admin users).
